

INVESTOR PITCH · 2025

ClinicalHours

Find. Apply. Track.

The infrastructure layer for pre-med clinical placement.

clinicalhours.org

**A pre-med junior spent 6 hours Googling
hospitals,
drafted 12 cold emails,
and heard back from 2.**

This is how clinical placement works today. Everywhere.

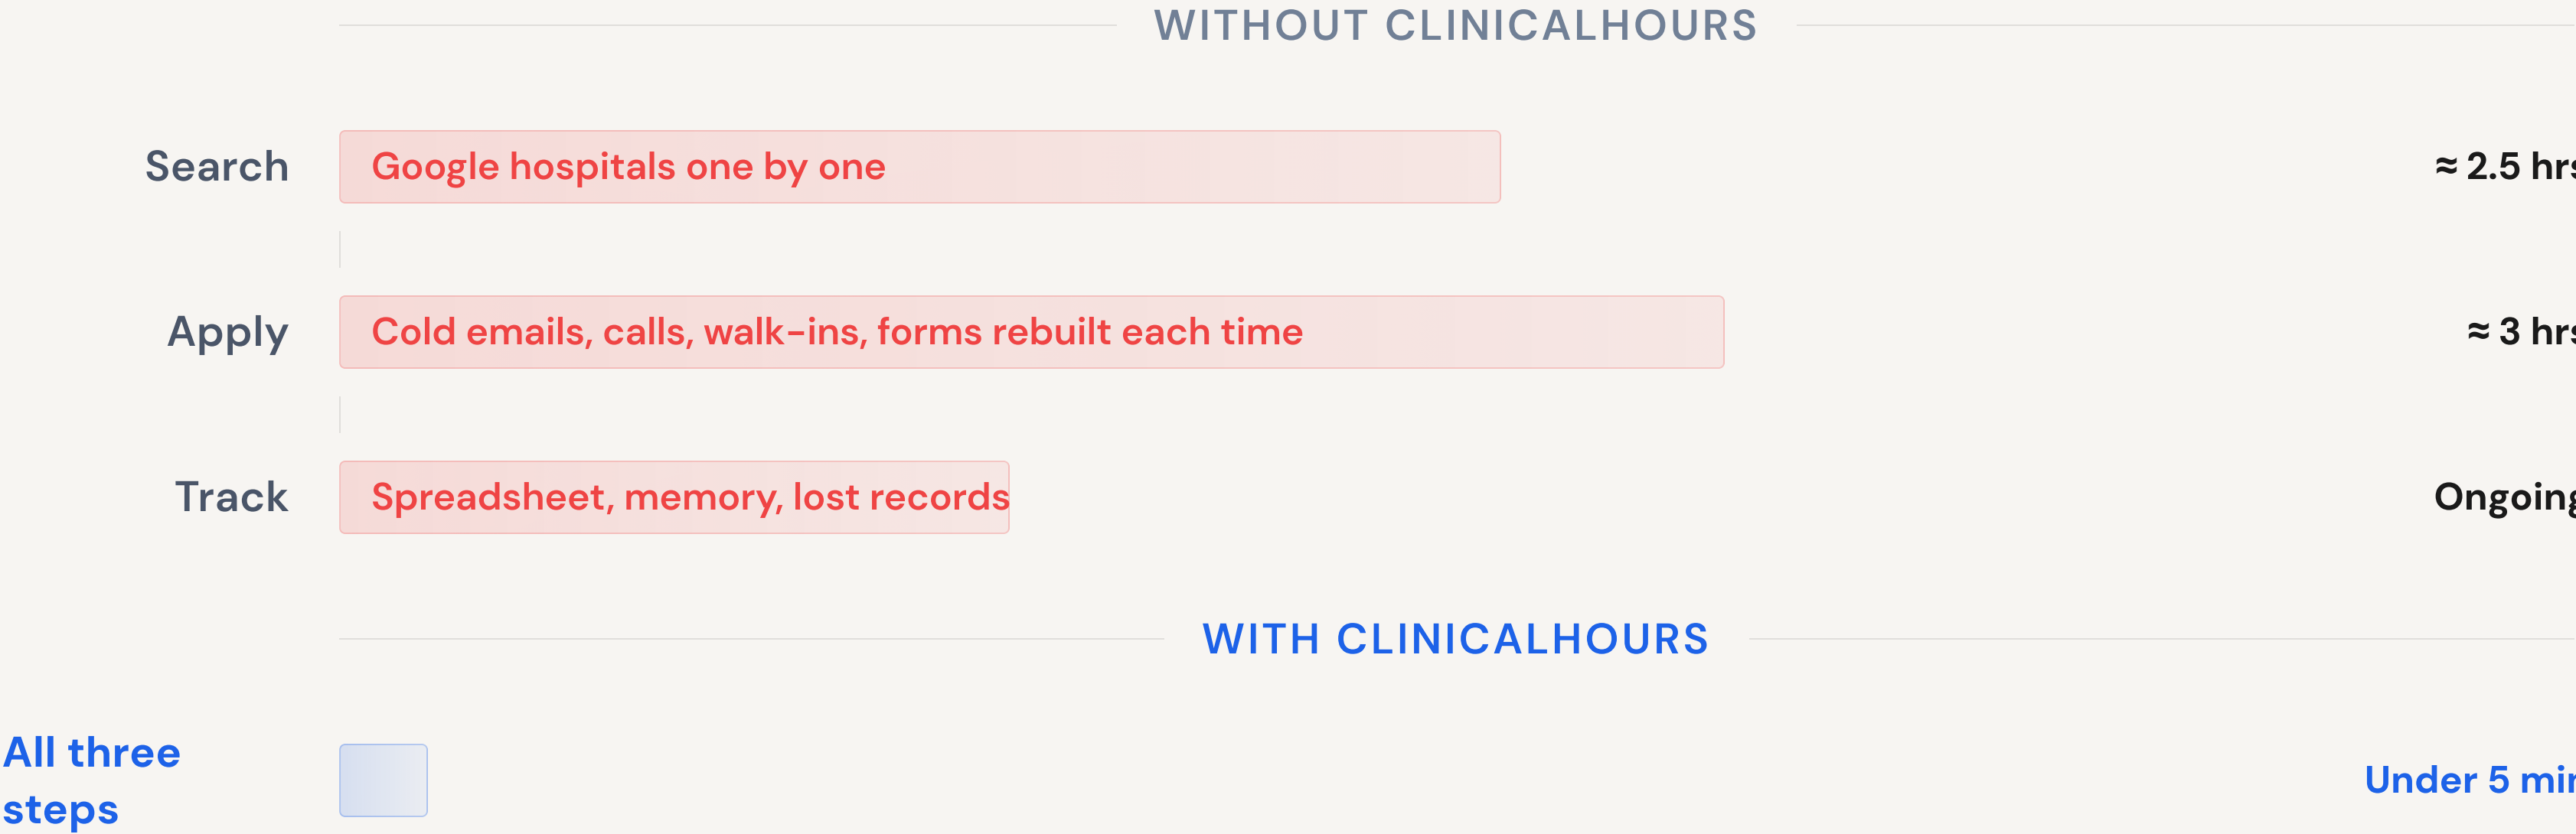

150,000

pre-med students compete for clinical
hours each year.

Zero standard process.

Six hours of work. For one application.

ON THE OTHER SIDE

1,500+ emails.
One coordinator.
Peak season.

Clinical coordinators manage volunteer intake with no dedicated software. Email threads, spreadsheets, missed follow-ups. The operational burden falls entirely on one person.

One platform. Two sides. Zero friction.

FOR STUDENTS

- Find 9,000+ clinics in one place
- Apply directly through a standardized intake form
- Track and log hours for AMCAS documentation

Discovery solved.

FOR CLINICS

- Filter and review applications in one dashboard
- Schedule interviews and manage positions
- Reduce coordination overhead by 70%

Inbox cleared.

FIND

Discovery is solved.

Students browse
9,000+ clinics by
location, specialty, and
availability. No more
cold searches.

Traction

200+ users · zero paid marketing

1 confirmed clinic partner

Market Size

TAM

\$24.8M

Nationwide hospitals, clinics, and pre-med students across all institutions

150,000 students · est. platform spend

SAM

\$4.4M

Reachable market within current go-to-market: Texas university systems and regional health networks

Texas-based pre-meds + partner clinics

SOM

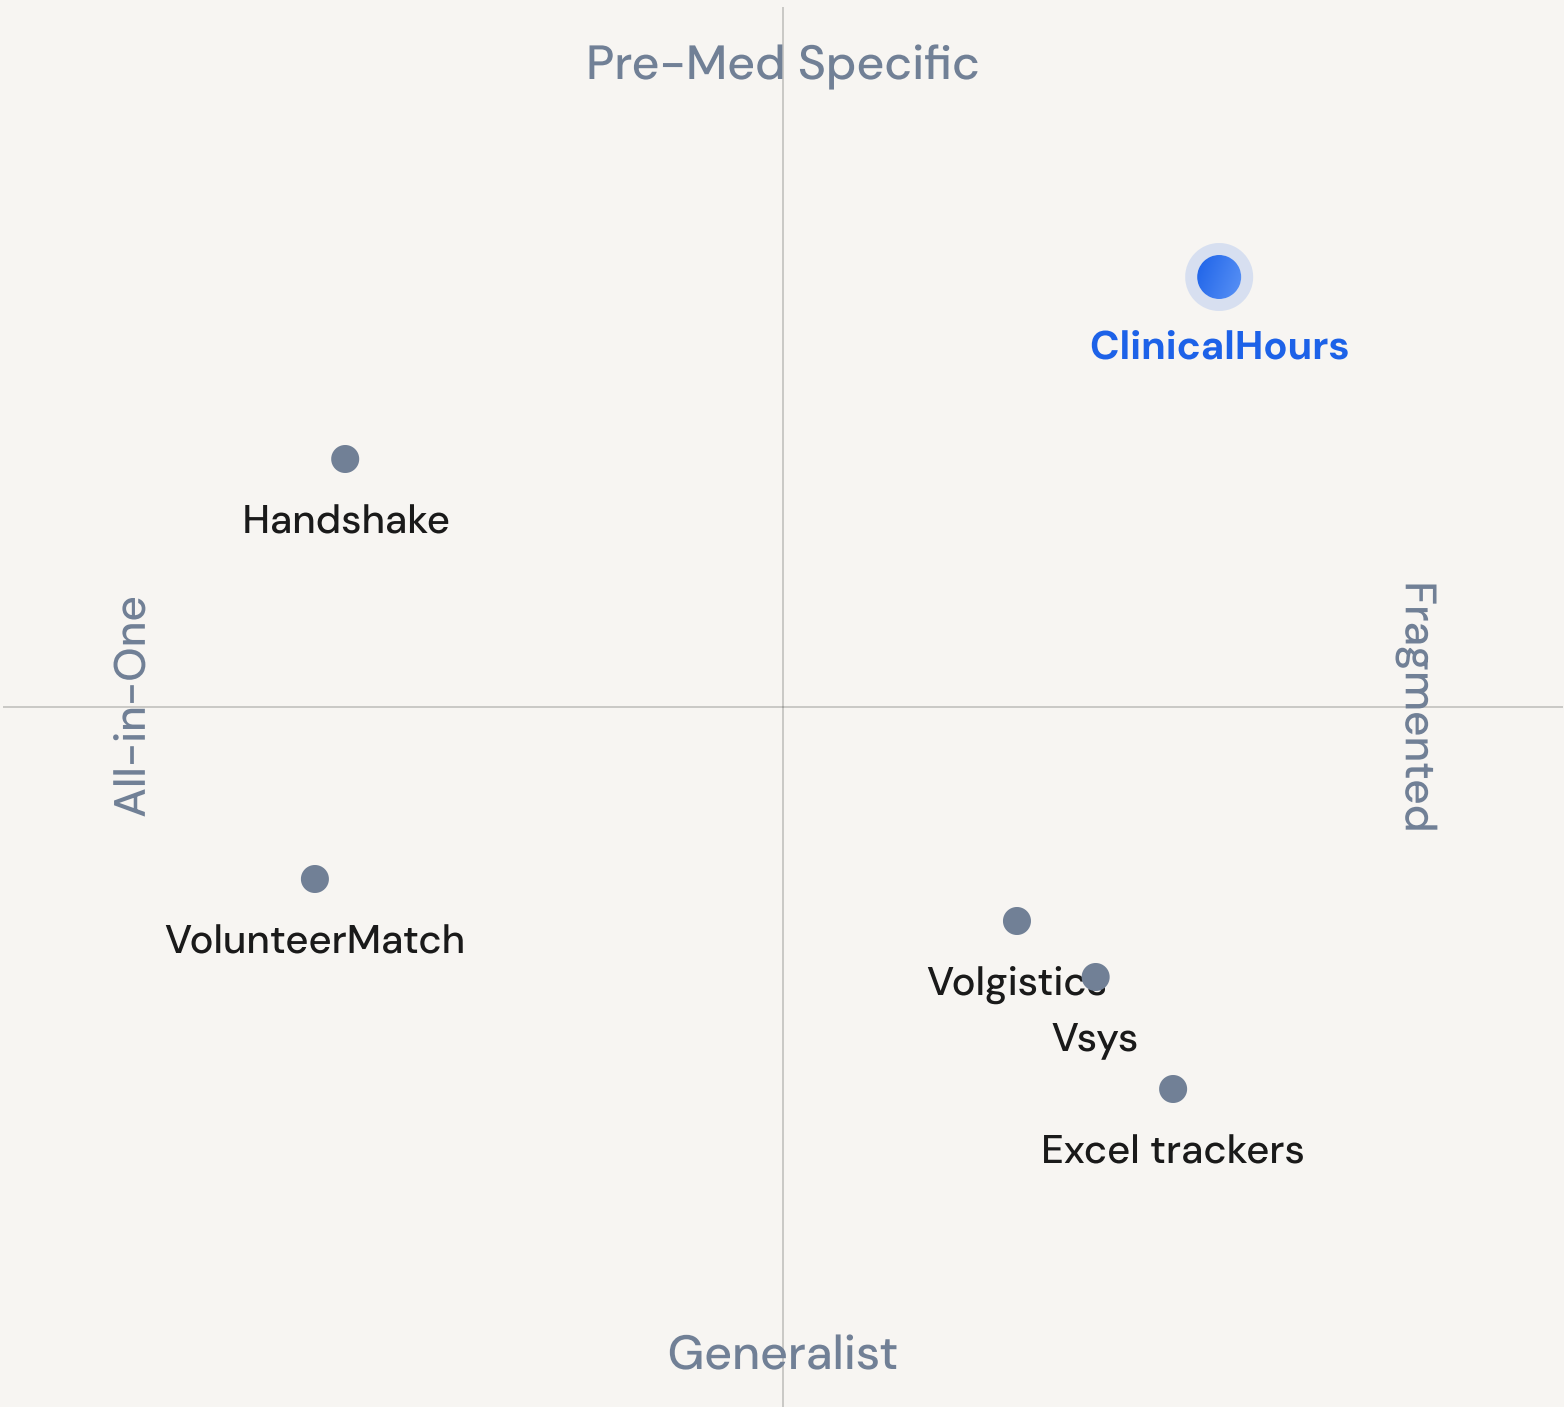

\$619K

Year 1 target: Texas A&M + UT Austin students, 5 paying clinic partners

Conservative Year 1 projection

Competitive Landscape

No existing tool is both pre-med specific and all-in-one. ClinicalHours is the only platform that closes both gaps.

ClinicalHours

Pre-med specific. Find + Apply + Track in one platform. No fragmentation.

Handshake / VolunteerMatch

Generalist job boards. No pre-med focus, fragmented workflow, no hour tracking.

Volgistics / Vsys

Clinic-side tools only. Pre-med adjacent but fragmented — no student discovery layer.

Excel / Email

Status quo. Maximally fragmented. No standardization on either side.

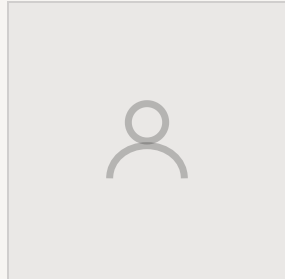

Business Model

Clinics	\$500-1,000/yr	Students	Freemium
• Custom clinic portal Application filtering, scheduling, mass email, position management • Replaces email-based intake entirely • 1 confirmed partner: BCS Free Health Clinic Phase 2: Clinic revenue is the primary growth lever		• Free Search, apply, track hours • Premium: \$4.99/mo AMCAS Activity Writer, AAMC Competency Tracker, Direct Application Finder • Free tier drives density; Premium converts at med school crunch Phase 1: Build density with free student access	

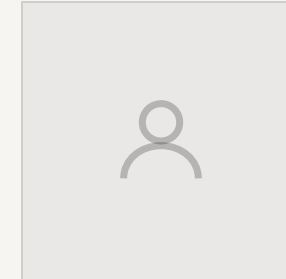

Team

Shivam Kanodia

Co-Founder · Product and Strategy

- Honors Industrial and Systems Engineering, Texas A&M University · Class of 2028
- Designed and owns the full product roadmap and go-to-market strategy
- Recruited first clinic partner and led first 200 user acquisitions

Raghav Tirupati

Co-Founder · Domain and Development

- Pre-Medicine, Texas A&M University · Class of 2028; lived the problem firsthand
- Built the full-stack platform from scratch: student app, clinic admin, and backend
- Deep domain expertise in clinical placement workflows and AMCAS requirements

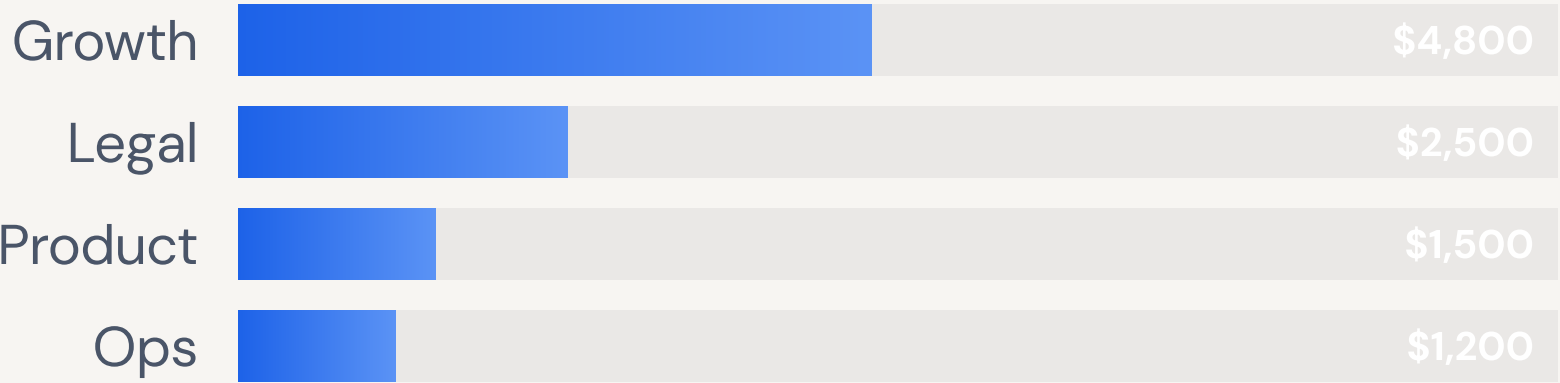

The Ask

Legal and entity setup	\$2,500
Product and infrastructure	\$1,500
Growth and user acquisition	\$4,800
Operations	\$1,200

\$10,000

6-Month Milestone

1,000 users
5 paying clinic partners
