

ClinicalHours

The future of medical applications

Find. Apply. Track

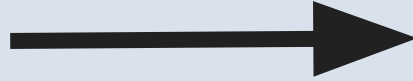

*A pre-med junior spends 6 hours
Googling hospitals, drafts 12 cold
emails, and hears back from 2 people.*

That's the story of over

150,000

pre-med students competing for clinical hours each year

Search.
Email.
Wait.

Find.
Apply.
Track.

That's the .between hoping for clinical hours and actually getting them.

Problem: Students

150,000 pre-med students. Zero standard process.

NO DISCOVERY

Students search, one by one.

NO COMMON APP

Email, phone, walk-ins. Each handled manually.

NO LOGGING

Hours and accomplishment go untracked.

Problem: Hospitals

1,500+ emails. One coordinator. Peak season.

EMAIL FLOOD

Coordinators handle hundreds of unfiltered applications. No tools, just inboxes.

NO STANDARD PROCESS

Email, phone, walk-ins. Each handled manually.

Our Solution

One platform. Two sides. Zero friction.

FOR STUDENTS

Find 9,000+ clinics

Apply directly

Track & log hours

FOR CLINICS

Minimize email chaos

Filter applications

Schedule interviews

🔗 BCS Free Health Clinic · Mar 28, 2026

Shadowed a physician administering vaccinations and observed proper injection technique, patient communication, and post-procedure monitoring. Learned how providers build quick rapport with patients to ease anxiety and ensure a smooth clinical experience.

🔗 BCS Free Health Clinic · Mar 14, 2026

Assisted with patient intake by recording vitals and updating intake forms for walk-in patients across a range of conditions. Learned how accurate triage documentation directly shapes the care decisions physicians make downstream.

🔗 BCS Free Health Clinic · Feb 14, 2026

Observed a physician conduct a routine physical exam and explain findings to a patient in plain, accessible language. Gained a clearer understanding of how providers balance clinical thoroughness with patient-centered communication

APPENDIX

APPENDIX: TAM– Student Side

Assumptions: Conservative premium rate and conversion due to testing and conducting market research to find ideal price point. All numbers are based on the CURRENT rate of \$5/mo. The # of serious pre-med grows each year.

TAM (Student Side, Nationwide)

- 54,699 students apply annually (AAMC 2025, accelerating rate)
- Average 3.5 years yields 191,000 serious pre-med applicants in the pipeline nationally
- Convert 5% to premium at \$60/yr = **\$573,000**

APPENDIX: TAM– Clinic/Hospital Side

Assumptions: Assume we ONLY work with programs that already take volunteers (our services could eventually convince clinics to start; we can create demand). Our TAM also assumes we are universally adopted and superior to the competition.

TAM (Hospital/Clinic, Nationwide)

- 6,100 Hospitals, 16,200 Federally Qualified Health Center (*HRSA Bureau of Primary Health Care*), 1,400 Free Clinics, and 14,000 Urgent Care Centers.
- Only 62% of urgent cares are not large chains (*Journal of Urgent Care Medicine*), yielding a total of 32,380 individual locations.
- This would yield a total market of 32,380 locations* \$750/location = **\$24.3 million**

Excludes independent physician group practices, a secondary market not captured in current projections due to the limited amount of volunteers slots per location.

APPENDIX: SAM – Student Side

Assumptions: Conservative premium rate and conversion due to testing and conducting market research to find ideal price point. All numbers are based on the CURRENT rate of \$5/mo. The # of serious pre-med grows each year.

SAM (Student Side, Nationwide)

- 54,699 students apply annually (AAMC 2025, accelerating rate)
- Average 3.5 years yields 191,000 serious pre-med applicants in the pipeline nationally
- 950 universities produce med-school applicants nationally (AAMC)
- Assume average of 2 reachable pre-med orgs at each school, 70 ACTIVE members per org (more successful + pre-med focused schools)
- This gives 133,000 students
- Convert 5% to premium at \$60/yr = **\$399,000**

APPENDIX: SAM – Clinic/Hospital Side

Assumptions: Assume we ONLY work with programs that already take volunteers (our services could eventually convince clinics to start; we can create demand)

SAM (Hospital/Clinic, Nationwide)

- 16,200 Federally Qualified Health Center (*HRSA Bureau of Primary Health Care*) and 1,400 Free Clinics
- Assumption that 30% have no structured, or inferior, volunteer management systems, which gives 5,520 locations
- This yields a SAM of **\$3.96 million**

Excludes independent physician group practices, a secondary market not captured in current projections due to the limited amount of volunteers slots per location.
Excluding urgent cares because the uncertainty with volunteering volume at locations

APPENDIX: SOM – Student Side, Year 1

Assumptions: Conservative premium rate and conversion due to testing and conducting market research to find ideal price point. All numbers are based on the CURRENT rate of \$5/mo. The # of serious pre-med grows each year.

SOM (Student side, 1-year outlook, Texas focused)

- 7,220 Texas med school applicants, 75% texas residents = 5,415 Texas resident applicants a year
- Average time spent searching for 3.5 yrs yields an average of 18,900 serious applicants at any given time
- Out of these students, 5% can be reasonably reached and converted to premium, yielding **\$56,700** in the first half-year.

APPENDIX: SOM – Clinic/Hospital Side, Year 1

Assumptions: Assume we ONLY work with programs that already take volunteers (our services could eventually convince clinics to start; we can create demand)

SOM (Hospital/Clinic side, 1-year outlook, Texas-focused)

- 700 Federally Qualified Health Centers (FQHC) and an estimated 550 free clinics (The Free Clinic Directory) for a total of 1,250. (Texas DSHS)
- Assumption that 100% have active volunteer programs for pre-meds (due to the structure of free clinics, relying on volunteers).
- Assumption that 60% are willing to pay; we don't know yet exactly the perfect price point to maximize the ceiling on our pricing.
- \$750/yr is under \$1,000, so we assume this makes the decision simpler for larger clinics. However, it's a high cost for smaller clinics, which we account for in the 40%. This puts us at 750 clinics.
- $750 * 750 = \text{\$562,500}$

APPENDIX: Market Methodology

Methodology Notes

- TAM assumes full market capture with no competitive displacement, per standard TAM convention. Assumes all locations currently accept volunteers.
- SAM narrows to segments reachable by ClinicalHours' go-to-market model. Excludes urgent care due to insufficient data on volunteer program prevalence at independent locations.
- SOM is a one-year Texas-focused market boundary. Sales execution assumptions (close rate, ambassador reach) are modeled separately in the financial projections.

APPENDIX: Market Sources

Student Side

- Annual med school applicants (54,699): AAMC, 2025 Applicant and Matriculant Data — [aamc.org](https://www.aamc.org)
- Universities producing med school applicants (950): AAMC Institutional Data
- 3.5-year average pipeline multiplier: Internal estimate based on average undergraduate pre-med timeline

Clinic / Hospital Side — TAM

- U.S. hospitals (6,100): American Hospital Association, 2024 Hospital Statistics — [aha.org](https://www.aha.org)
- FQHC service delivery sites (16,200): HRSA Bureau of Primary Health Care — bphc.hrsa.gov
- Free and charitable clinics (1,400): National Association of Free and Charitable Clinics — nafcclinics.org
- Urgent care centers (14,000): Urgent Care Association Industry White Paper, July 2023 — urgentcareassociation.org
- Urgent care chain concentration (38% operated by top 100 entities): Journal of Urgent Care Medicine, 2024 Top 100 by Number of Locations — jucm.com

APPENDIX: Market Sources

Clinic / Hospital Side — SAM

- FQHC service delivery sites (16,200):
HRSA Bureau of Primary Health Care
— bphc.hrsa.gov
- Free and charitable clinics (1,400):
National Association of Free and
Charitable Clinics — nafcclinics.org
- 30% lack structured volunteer
management: Internal estimate;
validated through advisor
conversations with William Shaw (St.
Joseph Health) and Rajeev Prashar
(Ascension)

Clinic / Hospital Side — SOM (Texas)

- Texas FQHC service delivery sites (700+):
Texas Department of State Health
Services — dshs.texas.gov
- Texas free clinics (550): The Free Clinic
Directory — freeclinicdirectory.org
- 60% willingness to pay: Internal
assumption based on pricing research and
advisor feedback

APPENDIX: Exit Strategy - Athenahealth Marketplace

CLINICALHOURS APP

Plug-and-play tracking module

ATHENA MARKETPLACE

Instant deployment to existing clients

170K DOCTORS

Single-click activation, all through Athena

WHY ATHENA BUYS US:

- **DATA:** Ownership of the medical school talent funnel
- **RETENTION:** Start managing their staff pipeline earlier
- **INNOVATION:** Fills the volunteer-to-workforce gap in their EHR suite

Athenahealth has 160,000+ providers and 117 million patients with zero pre-professional data.

APPENDIX: Advanced Revenue – University Advising

The Problem: Advisors manage students via email and spreadsheets

The Solution: A centralized “Command Center”.

CORE ADVISOR TOOLS:

- **PIPELINE MONITORING:** See which students are hitting benchmarks
- **AT-RISK ALERTS:** Identify inactive students
- **INSTANT EXPORTS:** Generate standardized reports on students for med-school applications.
- **PLACEMENT INSIGHTS:** View which local clinics provide best student experience.

APPENDIX: Competitive landscape – Data Ownership

Feature	Volgistics/Vsys	ClinicalHours
Primary User	Hospital Admin (HR)	Student & University
Data Model	Siloed	Portable
Market Focus	Large Health Systems	Smaller Clinics

Legacy systems treat the student as a temporary guest
ClinicalHours treats the student as a permanent asset

APPENDIX: The Ask

Legal — \$2,500

- Texas LLC formation (state filing fee): ~\$300
- Clerky or equivalent for operating agreement + founder docs: ~\$500
- Termly or equivalent for privacy policy + terms of service: ~\$200
- Contract templates for clinic B2B agreements: ~\$500
- Buffer for misc legal needs: ~\$1,000

Product — \$1,500

- Apple Developer Program (annual): \$99
- Supabase (free tier, no cost projected): \$0
- OpenAI / Anthropic API usage (AI features): ~\$600
- Vercel Pro (hosting, if free tier exceeded): ~\$200
- Lovable + Cursor subscriptions (~\$40/mo x 6 months): ~\$600

Growth — \$4,800

- Pre-med influencer content (\$25/video x ~20 videos): \$500
- Campus outreach materials (flyers, tabling): \$300
- Event costs (pitch competitions, travel, registration): \$700
- Ambassador program (commission-based, no upfront cost): \$0
- Paid social / targeted ads to pre-med students: \$3,300
 - a. Marketing Agent API costs

Operations — \$1,200

- Domain + hosting misc: \$100
- Claude Code + productivity tools (~\$40/mo x 12 months): \$480
- Miscellaneous (printing, shipping, unforeseen): \$620
